

Suti Expense Support Plan

User Issues

Vessel Users – Level 1 support is to be provided by crew managers

In the event that the crew manager is unable to resolve the issue, the crew manager should submit a ticket to the Marquette IT Helpdesk. The ticket will be assigned to the Suti Admin. Under no circumstances should vessel personnel contact the Suti Admin directly.

Shore Users – Level 1 support is to be provided by the department approver.

In the event that the department approver is unable to resolve the issue, the approver should submit a ticket to the Marquette IT Helpdesk. The ticket will be assigned to the Suti Admin. Under no circumstances should shore personnel contact the Suti Admin directly.

The Suti Admin will attempt to resolve the issue. If they are unable to resolve, the admin will contact Suti Support 888-445-2847 support@sutisoft.com

Required Manual Updates – Vessel Expense Reports

Suti is relying on master data coming from Dayforce, the employee master and the vessel master (from the Dayforce Org structure) which refreshes daily. Associated with each vessel in Dayforce is an approval workflow code for Suti. The workflow codes control who approves travel or procurement expenses for the particular vessel. The code format is “*letter, number*” where the letter represents the travel approver and the number represents the procurement approver. The letter or number that represents an approver are tied to approver employee records in Dayforce to identify the approver’s user ID.

Suti Expense Support Plan

Manual updates are required whenever any of the following occur:

- Vessel changes divisions (or bareboat charter)
 - Update the approval codes on the vessel record within the Dayforce Org [\[Dayforce Admin\]](#)
- Vessel moves to a different VMT
 - Update the approval codes on the vessel record within the Dayforce Org [\[Dayforce Admin\]](#)
- Either the travel or purchasing approver changes for a particular vessel
 - Update the approval codes on the vessel record within the Dayforce Org [\[Dayforce Admin\]](#)
- Either the travel or purchasing approver changes for a VMT
 - Remove the approval code from the Dayforce employee record of the former approver and add that same code to the new approver employee record [\[Dayforce Admin\]](#)

Vessel Update

Under “Org Setup”>”Organization”

Locate the Vessel in the hierarchy (by division, then division vessel)

Once select the Vessel – click the “Address” Tab

Vessel Approval Workflow Code is Address Line 2

The screenshot displays the Dayforce web interface. On the left, a navigation pane shows the organizational hierarchy: Marquette Transportation > Closed Locations > Gulf > Offshore > River > River - Vessel > Alix Anne Eckstein. The main content area is titled 'Site: Alix Anne Eckstein' and 'Updated on 4/1/2026 1:26 PM by stacey.reames'. Below this, there are tabs for General, Address (selected), Contact, Legal Entity, History, Authorities, Employees, Closures, Location, Comparable Site, and Compliance Properties. The Address tab contains several input fields: Public Name, Business Phone, Termination Address, Country (United States of America), State / Province (Kentucky), Address (6887 US 62), City (Carrille), and Zip Code (42923). There is also a checkbox for 'Geo Points Override'.

Approver Update

Use the People icon and find the employee

Scroll to “Employment” then “Employee Properties”

Their Approval Code ID is entered as EE Property “SUTI Approver Code”

The screenshot shows the Dayforce interface for an employee's profile. At the top, there's a search bar and navigation icons. Below that, the employee's name 'Shoulta, Samantha L.' is displayed along with their title 'Crewing - Director of Crew Management' and location 'River - Operations Site - River - Crewing'. The 'Employee Properties' section is active, showing a table with one row: 'SUTI Approver Code' with a description 'Code defining an Approver on a Vessel for Suti API pull data', an effective date of '3/25/2026', and a value of '10'. The left sidebar contains various navigation options like Work, Payroll, Personal, and Employment, with 'Employee Properties' currently selected.

Required Manual Updates – General

Manual updates are required whenever any of the following occur:

- Add / Remove Expense Categories / Sub-categories
 - Perform necessary updates to Suti Expense Category and Expense Sub-category master files [\[Suti Admin\]](#)
- Change expense category GL code
 - Perform necessary updates to Suti Expense Category and Expense Sub-category master files [\[Suti Admin\]](#)
- Changes needed to expense item validation rules
 - Contact Suti Support 888-445-2847 support@sutisoft.com [\[Suti Admin\]](#)
- Dayforce URL Changes (twice per year)
 - Dayforce has a major product release twice per year. When they issue a new release, the URL used by Dayforce APIs is changed. After Dayforce changes the URL, APIs used with Dayforce will stop functioning until the URL is updated to the new value [\[Dayforce Admin\]](#)

Suti Expense Support Plan

Admin Menu

The screenshot shows the Suti Expense Admin Menu. The top navigation bar includes links for Role/Approval Flows, Departments, Employees, Miscellaneous, **Customize**, and Help. The **Customize** dropdown menu is open, showing options: Security Preferences, Branches, User Service Restriction, **Expense Category Customization**, Sub-category Customization, Expired Reports, Email Customization, User Menus, Finance Menus, Customize Payment Method, and Admin Switch. The main content area shows the 'Admin Settings' tab with various configuration options for the company, including Company Title, Company Country, Session Timeout, and Allowable Countries.

Expense Category Update

The screenshot shows the 'Expense Category Customization' form. A red arrow points to the 'Enable For' checkbox, which is checked. A red box highlights the 'GL Code' field, which contains the value '6610'. A red text box with an arrow pointing to the 'Enable For' checkbox contains the text: 'Use this check box to enable / disable the expense category'. The form includes fields for Expense Categories, Display Name, Description, Receipt, Province, Cost Centers, and Default Tax. The 'Update' button is visible at the bottom right.

Suti Expense Support Plan

Expense Sub-Category Update

The screenshot displays the Suti Expense Support Plan interface. A modal window titled "Update Sub-category" is open, allowing for the modification of an expense sub-category. The "Expense Code" field is highlighted with a red box and contains the value "6640". The "Expense Category" dropdown is set to "Mileage". The "Role/Approval Flow" dropdown is set to "Role - Admin". The "Tax Name" dropdown is set to "Select". The "Description" and "Note" fields are empty. The "Update" button is highlighted with a red box. The background table shows a list of expense codes and categories, with "6640" and "Mileage" highlighted in red.

Expense Code	Expense Category
6640	Mileage
7639	Miscellaneous
6769	Miscellaneous
6721	Miscellaneous
6710	Miscellaneous
6724	Miscellaneous
6640	Mileage

Data Integration

A scheduled process within Suti uses a REST API to initiate a GetReport request in Dayforce and import that data into Suti. There are two of these requests, one to extract active employee data and another to extract vessel org data. These processes are scheduled to run at 10am and 2pm daily.

Two files are exported from Suti, one is the import file for Dayforce indicating payments due to employees and the other is an import file for Great Plains that includes all of the GL details associated with those payments. These two files are generated on the 13th of the month and two days prior to the last day of the month. The files are placed in a folder named "Outgoing" on the Suti SFTP site. The file naming convention is "GL_Export_Details_DDMonthYY.csv" and "DF_Export_Details_DDMonthYY.csv" where "GL" is used for the Great Plains GL import file and "DF" is used for the Dayforce reimbursement file. Scheduled processes monitor this folder and when the files are detected, a Dayforce API is launched to import the payroll entries into Dayforce and a Velosio script runs to separate the GP GL data by division and push it into Great Plains.

Port: 22

The potential points of failure are:

- Vessel and/or employee data is not being updated in Suti
 - This could be a failure in either Dayforce or Suti since Suti is issuing the API call and Dayforce is generating the data file (report). Determine if the issue is on the Dayforce side. [\[Dayforce Admin\]](#) If Dayforce is working correctly, contact Suti Support 888-445-2847 support@sutisoft.com [\[Suti Admin\]](#)
- Export files are not being generated by the scheduler or are not being placed in the correct FTP folder
 - Investigate and, if necessary, contact Suti Support 888-445-2847 support@sutisoft.com [\[Suti Admin\]](#)
- The Dayforce and/or Great Plains import fails
 - Investigate and work with Dayforce and/or Great Plains admins to determine cause of failure and correct any issues. [\[Marquette Helpdesk\]](#) Re-export the files from Suti. [\[Suti Finance Admin\]](#)

Operational Procedures

Things that occur in normal day-to-day operations that may impact Suti:

- Employee position change in Dayforce
 - Employee must submit all of their expenses for approval **BEFORE** their role is updated in Dayforce
- Change to vessel / department approver
 - Current approver should process all expense reports assigned to them for the vessel / department **BEFORE** the approval workflow is updated in Dayforce
