

Suti Expense Support Plan

User Issues

Vessel Users – Level 1 support is to be provided by crew managers

In the event that the crew manager is unable to resolve the issue, the crew manager should submit a ticket to the Marquette IT Helpdesk. The ticket will be assigned to the Suti Admin. Under no circumstances should vessel personnel contact the Suti Admin directly.

Shore Users – Level 1 support is to be provided by the department approver.

In the event that the department approver is unable to resolve the issue, the approver should submit a ticket to the Marquette IT Helpdesk. The ticket will be assigned to the Suti Admin. Under no circumstances should shore personnel contact the Suti Admin directly.

The Suti Admin will attempt to resolve the issue. If they are unable to resolve, the admin will contact Suti Support 888-445-2847 support@sutisoft.com

Required Manual Updates – Vessel Expense Reports

Suti is relying on master data coming from Dayforce, the employee master and the vessel master (from the Dayforce Org structure) which refreshes daily. Associated with each vessel in Dayforce is an approval workflow code for Suti. The workflow codes control who approves travel or procurement expenses for the particular vessel. The code format is “*letter, number*” where the letter represents the travel approver and the number represents the procurement approver. The letter or number that represents an approver are tied to approver employee records in Dayforce to identify the approver’s user ID.

Suti Expense Support Plan

Manual updates are required whenever any of the following occur:

- Vessel changes divisions (or bareboat charter)
 - Update the approval codes on the vessel record within the Dayforce Org [\[Dayforce Admin\]](#)
- Vessel moves to a different VMT
 - Update the approval codes on the vessel record within the Dayforce Org [\[Dayforce Admin\]](#)
- Either the travel or purchasing approver changes for a particular vessel
 - Update the approval codes on the vessel record within the Dayforce Org [\[Dayforce Admin\]](#)
- Either the travel or purchasing approver changes for a VMT
 - Remove the approval code from the Dayforce employee record of the former approver and add that same code to the new approver employee record [\[Dayforce Admin\]](#)

Required Manual Updates – General

Manual updates are required whenever any of the following occur:

- Add / Remove Expense Categories / Sub-categories
 - Perform necessary updates to Suti Expense Category and Expense Sub-category master files [\[Suti Admin\]](#)
- Change expense category GL code
 - Perform necessary updates to Suti Expense Category and Expense Sub-category master files [\[Suti Admin\]](#)
- Changes needed to expense item validation rules
 - Contact Suti Support 888-445-2847 support@sutisoft.com [\[Suti Admin\]](#)
- Dayforce URL Changes (twice per year)
 - Dayforce has a major product release twice per year. When they issue a new release, the URL used by Dayforce APIs is changed. After Dayforce changes the URL, APIs used with Dayforce will stop functioning until the URL is updated to the new value [\[Dayforce Admin\]](#)

Operational Procedures

Things that occur in normal day-to-day operations that may impact Suti:

- Employee position change in Dayforce
 - Employee must submit all of their expenses for approval **BEFORE** their role is updated in Dayforce
- Change to vessel / department approver
 - Current approver should process all expense reports assigned to them for the vessel / department **BEFORE** the approval workflow is updated in Dayforce
